

How to connect to an Opticomm ONT (Optical Network Terminal)

1. Connect the Power port on the back of your router to your power socket
2. Connect the WAN port on the back of your modem/router to the UNI-D port on the ONT. When your Opticomm service is active, InfiNET will send you an email with the UNI-D port number that has been activated
3. Connect your PC/Switch/Device to any of the LAN ports on the back of your router

Note: If InfiNET have supplied the modem/router, it will be pre-configured
